Building Product Information Sheet

Product name:

Everhard Drain Matting

Product description and its intended use:

Everhard's extensive range of surface water drainage systems are designed for various residential & commercial outdoor drainage projects and made to withstand harsh weather and environmental conditions.

Surface water drainage is essentially the removal of excess water from the surface and into a drainage system in a controlled manner and as quickly and effectively as possible.

Relevant Building Code

B2.3.1(c)

E1.1/E1.2

E1.3.1/E1.3.2

E1.3.3

Statement on how the building product is expected to contribute to compliance:

B2 Durability

This product is a component within the plumbing services of a building, typically controlling the flow water at a terminus, is easy to access and replace, and failure would be easily detected during normal use.

E1 Surface Water

The objective of this provision is to safeguard people from injury or illness, and other property from damage, caused by surface water, and protect the outfalls of drainage systems.

- options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)
- standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured
- physical properties of the building product
- how the building product is intended to be used.

Limitations on the use of the building product:

Our geotextile products act as a drainage blanket, ideal for installation beneath ground coverings such as bitumen and gravel.

<https://www.everhard.com.au/category/environmental/geotextile/>

Design requirements that would support the appropriate use of the building product:

Everhard's Drain Matting non-woven geotextile provides a cost-effective solution for the filtration of water. This can be for drainage purposes such as absorption trenches or subsoil drainage. Retail bags are available, ideal for small jobs. Or, purchase large rolls of up to 2 metres wide for a bigger or commercial project.

Installation requirements (also provide link to the product installation guide):
