

CLASS 1

Building Product Information Sheet

Product name:

Everhard EasyDRAIN Edge

Product description and its intended use:

Everhard's extensive range of surface water drainage systems are designed for various residential & commercial outdoor drainage projects and made to withstand harsh weather and environmental conditions.

Surface water drainage is essentially the removal of excess water from the surface and into a drainage system in a controlled manner and as quickly and effectively as possible.

Product identifier (if applicable):

Everhard EasyDRAIN Edge

(This could be a Global Trade Item Number (GTIN) or quick response code (QR code), or any other distinguishable part/model number or identifier.)

Place of manufacture: Aotearoa New Zealand Overseas

Legal and trading name of the manufacturer(s):

Everhard Industries Pty Ltd

Address for service:

Level TREET NAME 454 Newman Rd SUBURB Geebung

CITY, COUNTRY Brisbane, Australia POSTCODE 4034

Relevant Building Code

B2.3.1(c)

E1.1/E1.2

E1.3.1/E1.3.2

E1.3.3

Statement on how the building product is expected to contribute to compliance:

B2 Durability

This product is a component within the plumbing services of a building, typically controlling the flow water at a terminus, is easy to access and replace, and failure would be easily detected during normal use.

E1 Surface Water

The objective of this provision is to safeguard people from injury or illness, and other property from damage, caused by surface water, and protect the outfalls of drainage systems.

- options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)
- standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured
- physical properties of the building product
- how the building product is intended to be used.

Limitations on the use of the building product:

149L/min/ metre flow rate

Suitable for: pathways, gardens and any salt affected areas (pools, coastal areas)

Polymer is suitable for salt and chemical affected areas (pools, coastal areas)

Design requirements that would support the appropriate use of the building product:

Made in Australia, from 100% recycled polymer, EasyDRAIN Edge is a sustainable and eco-friendly drainage choice for homeowners and installers.

With a generous internal channel depth of 100mm and only 20mm visible once installed, EasyDRAIN Edge has components to suit various configurations whilst having the ability to effectively hold and distribute surface water efficiently.

System components available include internal corner, external corner, heel friendly insert, end cap, converter and access pit.

Installation requirements (also provide link to the product installation guide):

Installation Information:

www.everhard.com.au/wp-content/uploads/2021/06/EasyDRAIN-Edge-Installation-Instructions_002-1.pdf

200mm paver length segments molded into the channel to allow for easy cutting and rejoining

- Converters are used to make any connection either male or female depending on what two pieces are being connected
- Connection to stormwater pipes can be made by using the 90mm molded bottom outlets
- Utilising the heel-friendly inserts allows the system to comply with industry standard AS1428 - designed for access and mobility.

Maintenance requirements (also provide link to the product maintenance guide):
