

CLASS 1

Building Product Information Sheet

Product name:

Everhard Flo-way & Rainwater Pits

Product description and its intended use:

Everhard's extensive range of surface water drainage systems are designed for various residential & commercial outdoor drainage projects and made to withstand harsh weather and environmental conditions.

Surface water drainage is essentially the removal of excess water from the surface and into a drainage system in a controlled manner and as quickly and effectively as possible.

Product identifier (if applicable):

Flo-way & Rainwater Pits

(This could be a Global Trade Item Number (GTIN) or quick response code (QR code), or any other distinguishable part/model number or identifier.)

Place of manufacture: Aotearoa New Zealand Overseas

Legal and trading name of the manufacturer(s):

Everhard Industries Pty Ltd

Address for service:

Level TREET NAME 454 Newman Rd

SUBURB Geebung

CITY, COUNTRY Brisbane, Australia

POSTCODE 4034

Website:

www.everhard.com.au

Email address:

info@everhard.com.au

Phone no. (if applicable):

NZBN (if applicable):

Legal and trading name of the importer (if applicable):

ACM (NZ) Pty Limited

Address for service:

STREET NAME 47 Stonedon Drive

SUBURB East Tamaki

CITY, COUNTRY Auckland, New Zealand

POSTCODE 2013

Website:

Relevant Building Code

B2.3.1(c)

E1.1/E1.2

E1.3.1/E1.3.2

E1.3.3

Statement on how the building product is expected to contribute to compliance:

B2 Durability

This product is a component within the plumbing services of a building, typically controlling the flow water at a terminus, is easy to access and replace, and failure would be easily detected during normal use.

E1 Surface Water

The objective of this provision is to safeguard people from injury or illness, and other property from damage, caused by surface water, and protect the outfalls of drainage systems.

- options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)
- standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured.
- physical properties of the building product
- how the building product is intended to be used.

Limitations on the use of the building product:

Australian made, with a UV stabiliser added to the polymer to extend the lifespan of the product, Flo-way pits that have an internal depth of 75mm and Rainwater pits have an internal depth of 280mm. Both systems can be installed as a drainage point by itself or can be connected to EasyDRAIN drainage systems. Available with a range of different grates to suit multiple applications including walkways, landscaped areas and various outdoor spaces. Refer to our quick guide to selecting drainage grates – choosing the right material for the intended environment is paramount to the success of your project.

Design requirements that would support the appropriate use of the building product:

Flo-way and Rainwater Pits are designed for use under garden taps, downpipes or any location where surface water collects however is not exposed to vehicle traffic. Everhard's pits are designed to suit 90mm or 100mm PVC pipes with additional components in the range to help secure the stormwater connection points and accessories that catch debris ensuring it won't end up in waterways or block the drainage system.

Installation requirements (also provide link to the product installation guide):
